OBJECTIVE

Software Engineer with 3 years of experience in back-end development. Looking for full-time Senior Golang Backend Developer positions.

My superpower is the ability to balance between "tactical" and "strategical" programming, allowing me to deliver new features without getting bogged down by technical debt.

EDUCATION

Master of Computer Science, ITMO University, Saint-Petersburg, Russia
Bachelor of Programming and Internet Technology, ITMO University, Saint-Petersburg, Russia

SKILLS

Engineering Skills	Golang, gRPC/REST/Kafka + protobuf, PostgreSQL/MongoDB/Redis, JavaScript
System Design	Microservices, DDD, CQRS and Event Sourcing, GoF design patterns
Tools	Docker, Kubernetes, OpenShift, Jenkins, Prometheus, Grafana, ELK-stack, Postman
Soft Skills	TDD, BDD, Agile(SCRUM), balancing New Features and Technical Debt
Language Skills	Russian - native, English - proficient

EXPERIENCE

Sber — Senior Software Engineer   *Saint-Petersburg, Russia* Jan 2024 - Present

- **Led a major refactor** and error handling optimisation, which **postponed a complete rewrite of the service by 2+ years**.
- Achieved **20% CPU load reduction** for one of the microservices through finding an optimal logging solution.
- Developed a microservice based contact centre solution for the **largest contact centre in Europe (300,000+ calls/day)** using **Golang, PostgreSQL, Kafka, REST, gRPC, OpenShift, ELK**.

Sellematics — Software Engineer   *Dubai, UAE* Aug 2023 - Jan 2024

- Led the development of a web-fingerprint farming service which led to **75% reduction in fingerprint-related errors**.
- Developed a scraper and parser components for Online Marketplace Analytics Platform using **Golang, Redis, MongoDB, Sentry, Prometheus, Grafana and Wireshark**.

Initi — Software Engineer   *Moscow, Russia* Mar 2022 - Jul 2023

- **Pioneered automated testing** in the project, which led to **50X reduction of manual testing time** for the component and **10% improvement in delivery speed** for the whole project.
- Developed a Network and Application Monitoring Solution using a proprietary language, **ClickHouse and Python**.

Diasoft — Junior Software Engineer   *Saint-Petersburg, Russia* Sep 2021 - Mar 2022

- Developed Apache modules that prepared data for a resource management system using **C++ and OracleDB**.

LEADERSHIP

- Sep 2021 - May 2022 - freshman mentor. Helped with the adaptation of new students in academic environment. Provided guidance and assistance as well as organised activities aimed at ice-breaking and team-building.
